

Create the "PDF Automation" Shortcut

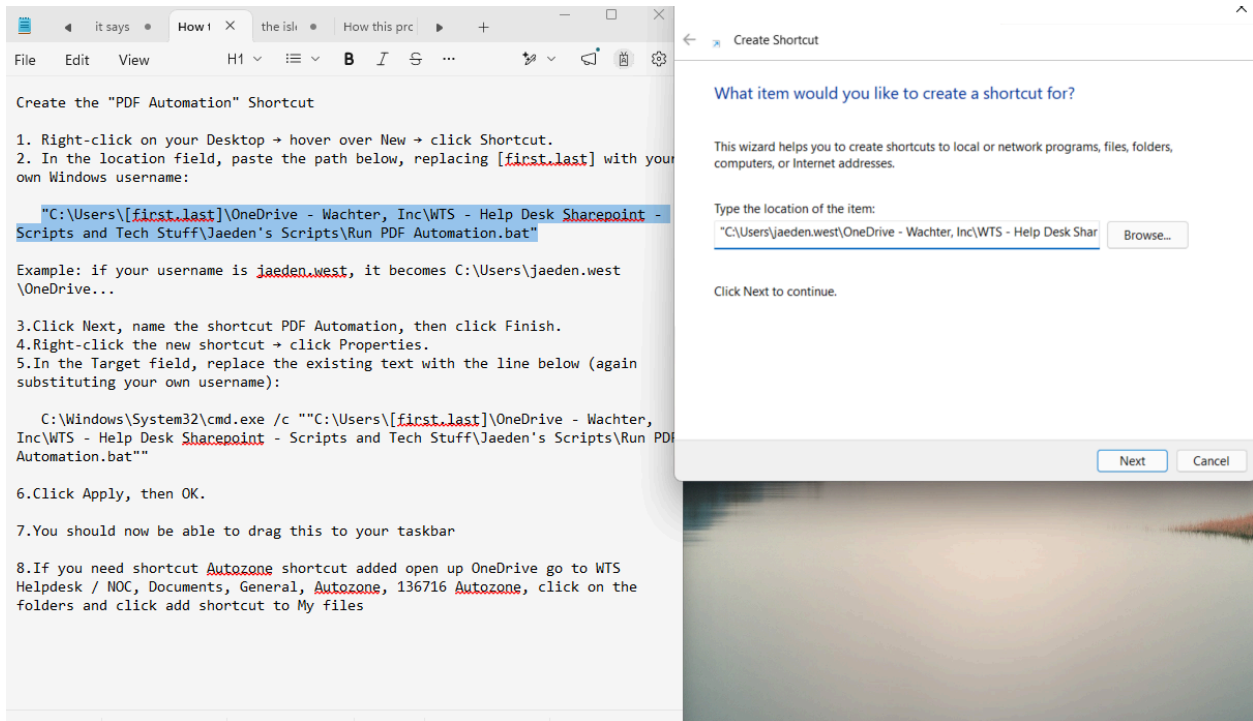

1. Right-click on your Desktop → hover over New → click Shortcut.

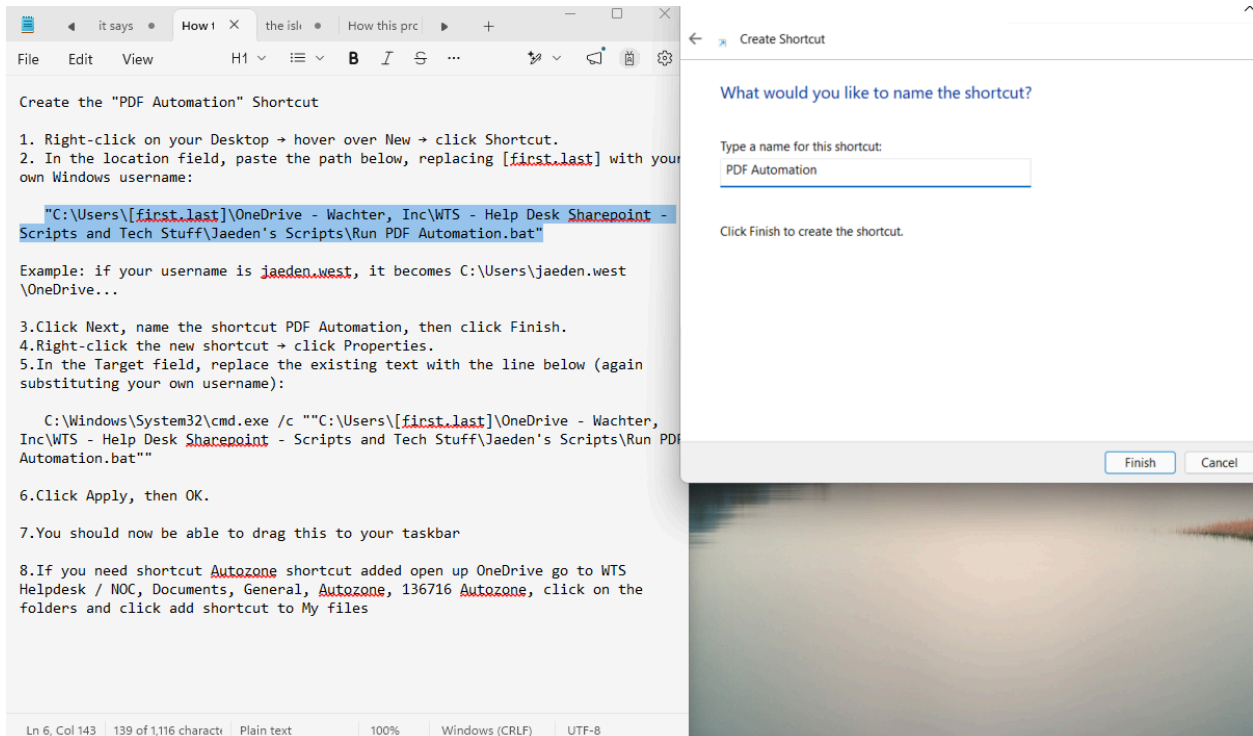

2. In the location field, paste the path below, replacing [first.last] with your own Windows username:

"C:\Users\[first.last]\OneDrive - Wachter, Inc\WTS - Help Desk Sharepoint - Scripts and Tech Stuff\Jaeden's Scripts\Run PDF Automation.bat"

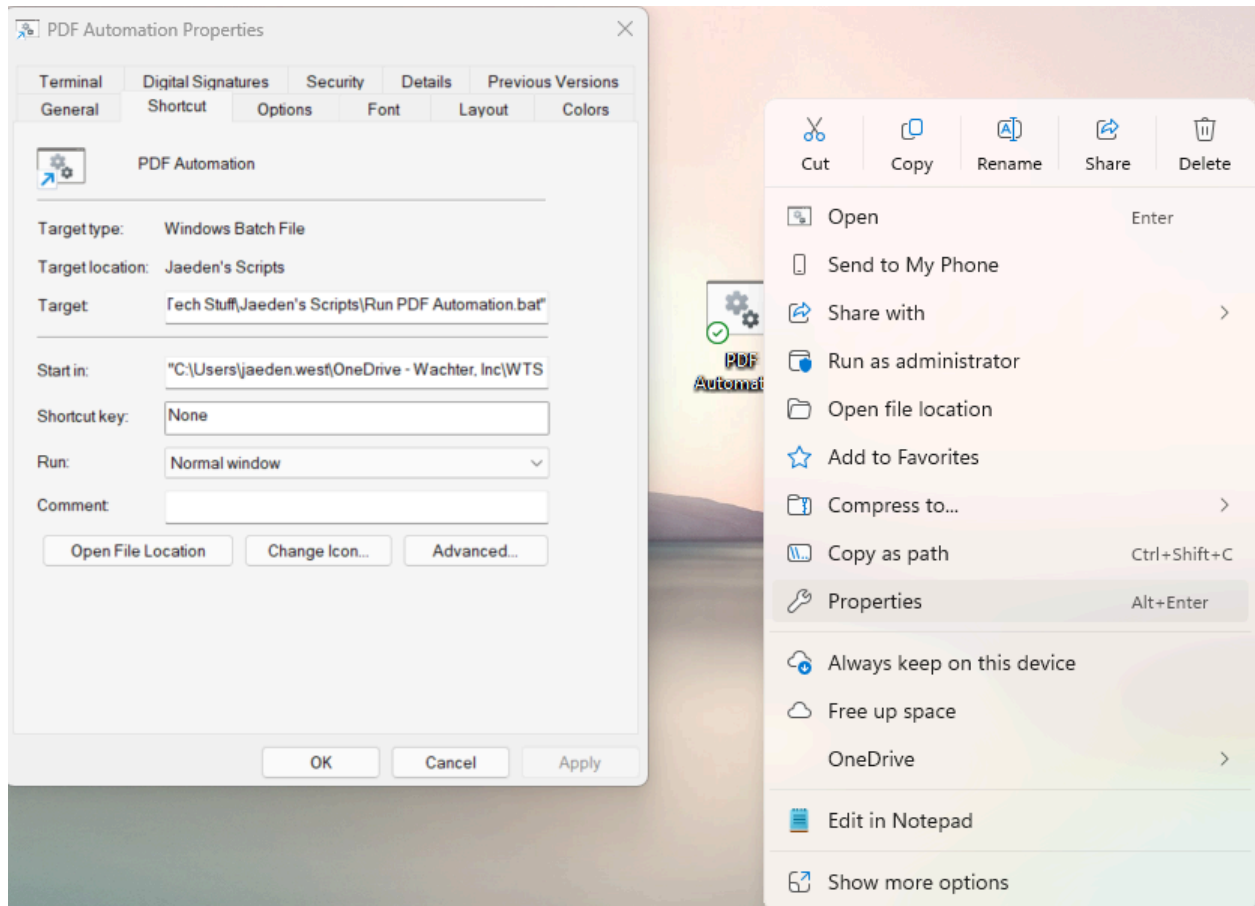

Example: if your username is jaeden.west, it becomes C:\Users\jaeden.west\OneDrive...

3. Click Next, name the shortcut PDF Automation, then click Finish.

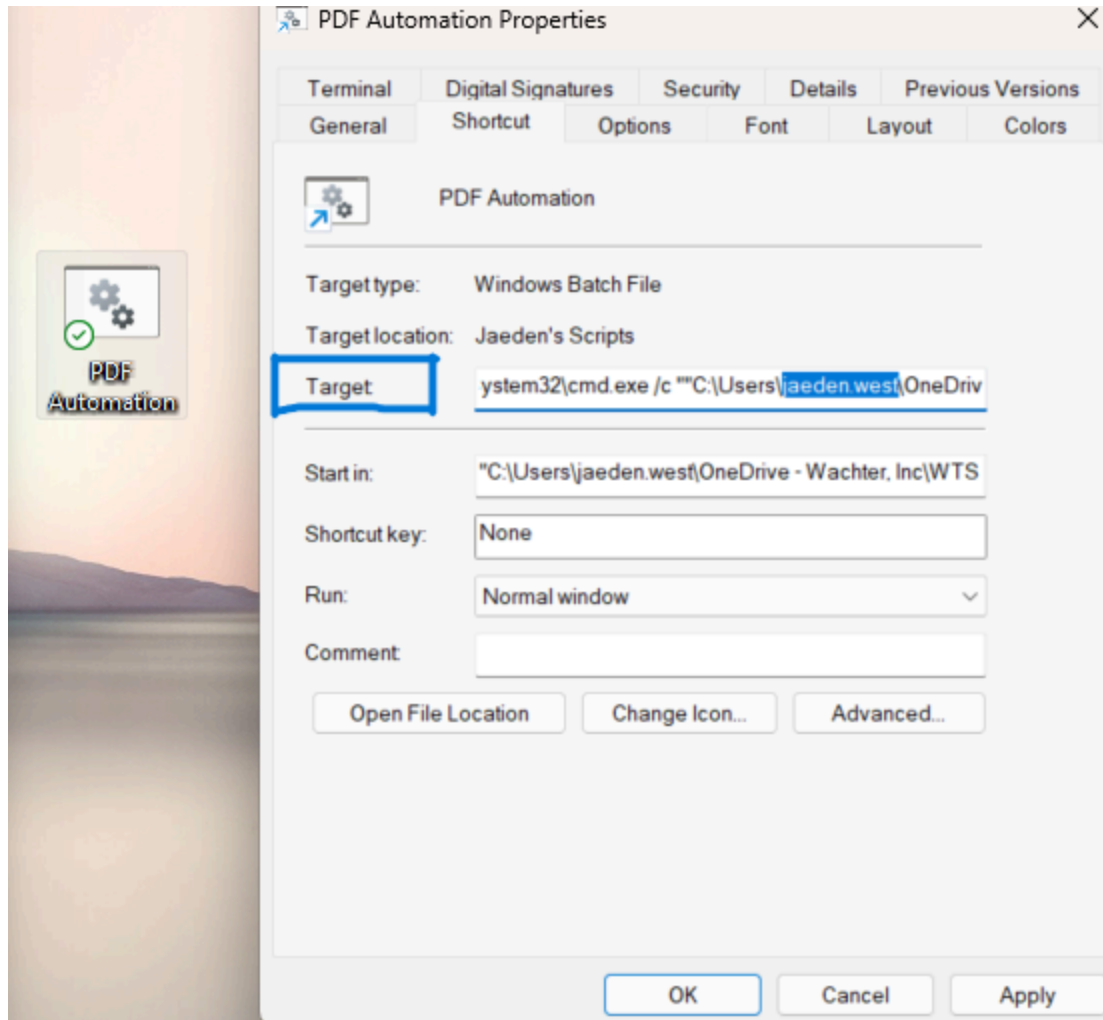

4. Right-click the new shortcut → click Properties.

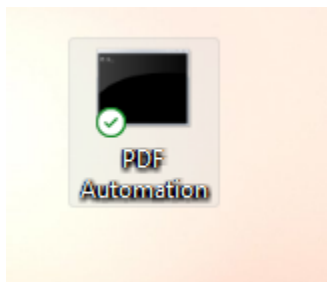

5. In the Target field, replace the existing text with the line below (again substituting your own username):

C:\Windows\System32\cmd.exe /c ""C:\Users\[first.last]\OneDrive - Wachter, Inc\WTS - Help Desk Sharepoint - Scripts and Tech Stuff\Jaeden's Scripts\Run PDF Automation.bat""

6. Click Apply, then OK.

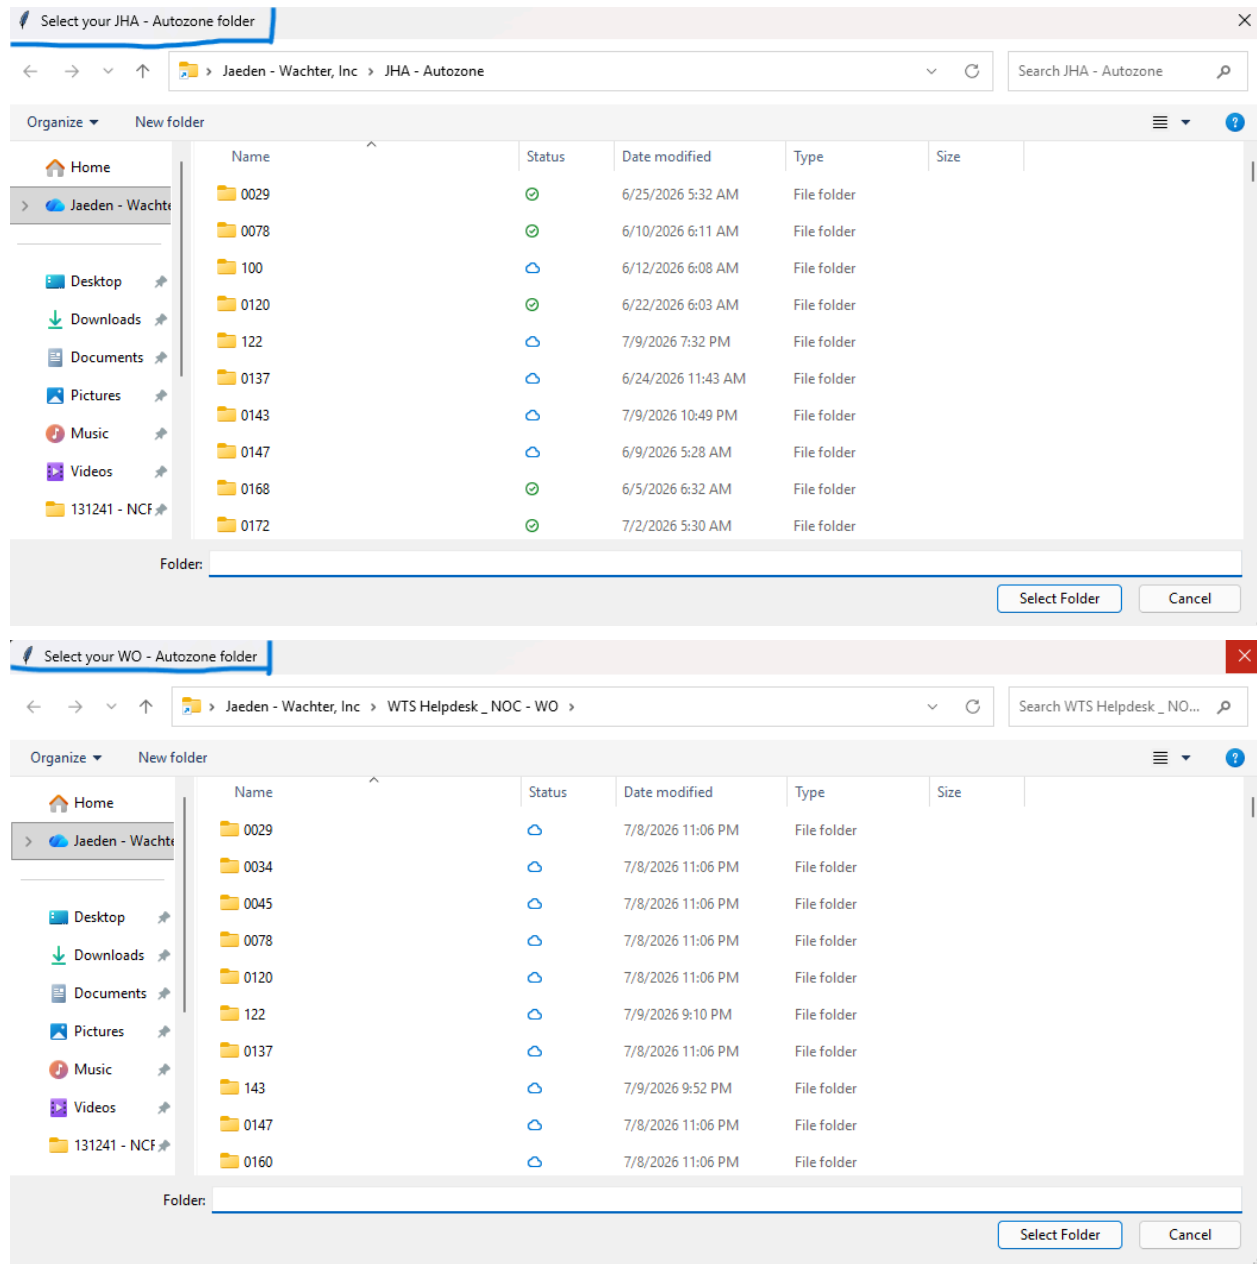

7. You should now be able to drag this to your taskbar

8.If you need shortcut Autozone shortcut added open up OneDrive go to WTS Helpdesk / NOC, Documents, General, Autozone, 136716 Autozone, click on the folders and click add shortcut to My files

9. The Program running should look like a feather and it will open up a dark black program

10. When opening for the first time it will prompt you to select your folders, make sure to look in the top left to see which folder you are selecting for
